

# Techno Kea

1. Investigate something of interest to find out how it works, e.g. show how a torch works from the bits that make it up. Demonstrate how magnets work. Other simple machines may be chosen according to the Kea's interest.
2. Make a poster showing different forms of technology.
3. Find out how one of the following services is produced and how it gets to or from your home: electricity, water, sewage or rubbish disposal.
4. Demonstrate how to use the phone, know your home phone number and describe how to call all emergency services.
5. Write a letter or make a card using a computer, email it to someone living far away. If the Kea does not have access to a computer at home, the Leader will need to investigate with the Kea where this can be done, e.g. school, local library or internet café.
6. Make a mobile, an origami shape, a model out of clay or plasticene, or a painting or drawing.
